Hi, I'm Ido, a Fullstack & Mobile developer.

With a wealth of hands-on experience and a firm dedication to producing clean and reusable code, I've crafted and shipped several of advanced modern Mobile applications from the ground up, as a sole dev and as a team lead. Along the way, I specialized in building high-performance, cross-platform mobile apps for both Android & iOS, with experience in advanced concepts & technologies like WebRTC, Real-Time GPS tracking, Geofencing, Native modules, and more.

My primary stack includes technologies such as Modern JavaScript/TypeScript (ES6), React, React Native, Android Studio, Xcode, NodeJS, MongoDB, Docker, and beyond. I've also expanded my expertise into the AI domain, working with advanced tools and workflows that go far beyond text-based LLMs - including Ollama, Retrieval-Augmented Generation (RAG) systems, n8n workflows (AI Agents), ComfyUI, LoRA training, fine-tuning, etc. I'm a highly driven self-taught developer who loves solving problems and exploring new areas.

Experience:

- **IDEO DIGITAL:** Feb 2023

As a sole developer, I was responsible for building and shipping the "הפניקס צעיר" app, a React Native application designed for usage-based insurance (pay-per-km). Integrated the CMT SDK for real-time location tracking and crash detection, and extensively leveraged native modules for Dynamic Island, Live Activities, and other platform-specific implementations. Also implemented push notifications, biometric authentication, advanced animations using Reanimated, and full Firebase integration.

- **8200 Alumni Consultant (Fintech):** March 2021 – 2023

As a team lead, we've built from the ground up a new platform for Crypto CFDs trading that provides real-time market data with advanced trading tools. available on [App Store](#) / [Play Store](#) – Ainvesting (Australia) / 8Invest (Europe). **A real-time app crafted to ensure high-performance efficiency, including RTL support (multi language app), upload files, and much more.**

- **Wavesounds (Startup):** Feb 2020 – 2021

Digital music application with access to millions of songs and other content from creators all over the world. - available only on [Play Store](#) as a (BETA) project.

Freelance Projects:

- A video call app that leverages **WebRTC protocol** to establish communication through real-time video & audio streaming. available on - "CallFlow".
- A mobile chat application designed for care teams, enabling seamless communication between medical staff and patients. Built with React Native and powered by CometChat and Keycloak - "Team BPC".

Administration Experience:

Corporate Lawyer at Moshe Kahn & Co. Law Firm, Tel Aviv - Dec 2018 – 2019

Hagag Buchnik Weinstein and Co. Law Firm, Tel Aviv - Sep 2017 – 2018

Education:

As a self-taught dev, I've taken charge of my education and progress - Anytime

Attorney at Law, Israel Bar Association, Jerusalem - Sep 2018
